SUMMARY

Full-stack developer with 10 years at T-Mobile, from Mobile Expert to Experience Associate Manager (Annual Winner's Circle 2024). Built a full-stack Cache Management tool and faster deployment pipelines through the Magenta Accelerator. Seeking a full-time role in backend systems and developer tooling.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, HTML, CSS

Frameworks: Spring Boot, Angular, Node.js, Express.js, React, Redux, RxJS, TailwindCSS

Tools & Practices: Redis, GitLab CI/CD, Kubernetes, REST APIs, WireMock, Cucumber, Jasmine, Karma, Git, Code Review, Agile

EXPERIENCE

Software Engineer Intern, Magenta Accelerator Program | T-Mobile, Overland Park, KS Aug 2026 – Oct 2026

- Built a full-stack **Cache Management tool** (Java/Spring Boot, Node.js/Express, Angular/TypeScript) giving engineers self-service Redis browse and write access, including a guided mode for **~40 object types**.
- Parallelized configuration-deployment scripts with batched render/compare phases and a single bulk cluster fetch, cutting non-prod runtime from **~6 minutes to ~30 seconds**.
- Standardized customer-facing 500/503 error messages across **50+ API configuration files**, verified with WireMock/Cucumber tests and in deployed environments.
- Built a Java fix with unit tests so a delinquent-account error returns 400 instead of a generic 500.
- Worked with engineering, SRE, QA, and product teams through code review and testing handoffs.

Software Engineer Intern | Ranial Systems Inc, Long Island City, NY Jun 2024 – Jan 2025

- Built a secure admin settings page for managing users, facilities, and employees, with protected routes and role-based access.
- Built responsive front-end components in Angular, TypeScript, and Tailwind CSS, debugging for cross-browser compatibility.
- Implemented front-end authentication and RxJS state management.
- Wrote unit and integration tests with Jasmine and Karma to improve code reliability.
- Collaborated with designers and engineers in a hybrid Agile team (stand-ups, code reviews, sprint planning), troubleshooting complex issues during development and testing.

Experience Associate Manager | T-Mobile, Queens, NY Jun 2015 – Present

- **Annual Winner's Circle 2024: top 1%** of sales representatives company-wide (**224 of 20,610**).
- Coached Sr. Mobile Experts through skill practice and account audits, helping the team consistently hit the Big 3 incentive in Q1 2026.
- Led the team to overachieve on Q2 2026 new-account targets by increasing customer interactions and coordinating with management; resolved billing escalations and device troubleshooting.

EDUCATION

Full Stack Web Development | Bloom Institute of Technology, Remote Apr 2020 – May 2021

BA, Sociology | Queens College, Flushing, NY Aug 2011 – Jan 2017

AWARDS

Annual Winner's Circle 2024 (top 1%) | Quarterly Winner's Circle (top 10%), earned multiple times since 2015
